

Lufra to Lookout Regularity Hillclimb

The **Lufra to Lookout Regularity Hillclimb** to be held on Saturday 19 August 2017 builds on the success of the previous two years.

Held on the picturesque Pirates Bay Drive at Eaglehawk Neck on the Tasman Peninsula the course starts in front of the Lufra Hotel and winds up 1.9 km of good bitumen road to the finish line.

The event is held in a unique location where guests and spectators can relax on the lawn and forecourt of the Lufra Hotel overlooking the wide expanse of Pirates Bay and the Tasman Sea and view the cars lining up for the start line.

The Lufra to Lookout is also unique in that it is run as a **Regularity** event rather than an outright speed event. In a Regularity hillclimb each competitor nominates the drivers target

An ideal event for the owner of a classic sports car wishing to stretch its legs in a controlled and legal environment.

time after the first timed run, and results are determined on the basis of variation from that time.

The benefit is that outright speed doesn't determine the winner, therefore the winning car doesn't have to be a high powered special race or rally car. It could just as likely be an historic or small capacity vehicle driven consistently.

The other benefit of being a Regularity event is that it allows standard road cars to compete without race-car type preparation..

It is still a speed event however, so safety is essential. Cars will need to satisfy the scrutineer that they comply with the relevant CAMS requirements for competition automobiles.

All vehicles will need to be road registered because the return road from the finish back to the start is on open public highway.

As a minimum all cars will need a 150mm blue triangle sign to indicate the battery location, a restrained fire extinguisher of at least 900g and two fasteners on rear hinged bonnets. (standard road registered cars may already comply if they have a two-stage catch).

Drivers will need to wear a CAMS compliant helmet and clothing covering from ankles to neck to wrists is required. Clothing of flammable synthetic material, such as nylon, is not acceptable.

Fire retardant overalls of Level A, B or C are suggested/recommended.
Shoes with leather uppers that cover the foot are required as a minimum.
Gloves are not mandatory, but if worn they must be FIA-standard flame retardant gloves.

A roll cage and harness is not required but strongly recommended.

Drivers need to hold a current road drivers licence, a CAMS Level 2S competition licence and be a member of a CAMS affiliated car club.

Drivers are also required to have had previous experience in CAMS speed events.

Supplementary Regulations and entry form for Lufra to Lookout should be available mid July after approval from CAMS.

Remember the date; **Saturday 19 August 2017** and get in early if you wish to book a room at Lufra Hotel.
